#### **DETAILED ACTION**

# Claim Objections

1. Claim 1 is objected to because of the following informalities: In claim 1, line 7, "one communication device" should be ----one first communication device-----.

Appropriate correction is required.

### **Double Patenting**

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-2, and 4-6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 13 of U.S.

Application/Control Number: 09/626,758

Art Unit: 2663

Patent No. 6,178,164. Although the conflicting claims are not identical, they are not patentably distinct from each other because leaving out the limitation of a single controller controlling all of the SCDs in the handoff list would have been an obvious variation of the invention since it is well known to provide a base station controller for controlling a plurality of base stations, or to leave out the base station controller and provide the control function at MSC, for example. In any case, the fact that the claim does not call for a controller does not mean that the invention is implemented without a controller. Thus, it would have been obvious for one of ordinary skill in the art at the time of the invention to leave out the specific recitation of a controller inherent in the teaching.

### Response to Arguments

4. Applicant's arguments filed April 22, 2004 have been fully considered but they are not persuasive. Applicant proposed to file a Terminal Disclaimer, but failed to actually file a Terminal Disclaimer. A Terminal Disclaimer is required to overcome the Double Patenting Rejection currently applied to the claims.

## Allowable Subject Matter

5. The following is a statement of reasons for the indication of allowable subject matter: Prior art fail to teach or fairly suggest at least one of the second communication device transmitting to the first communication device a handoff list of second communication devices to which the first communication device is permitted to handoff

when in a system access state, and each of the second communication device in the handoff list transmitting a channel assignment message to the at least one first communication device.

#### Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
